How do I join my pattern?

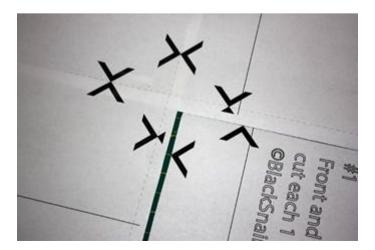

Here you see how it looks printed, on the leftt side there are the sheets with the sewing instructions, on the right side the pattern sheets.

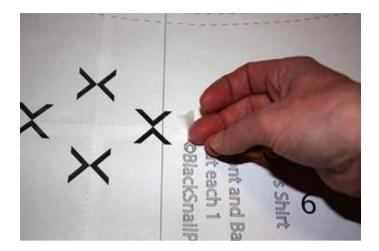

Cut along the fine dashed line, but only at the left and upper edge. This way it`s easier to assemble the pattern afterwards

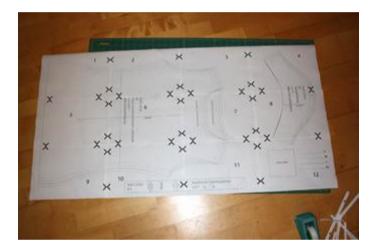

Join the sheets as shown on the diagram and fix them with small pieces of adhesive tape.

Try to match the crosses exactly.

The sheets are only fixed with smal pieces of adhesive tape, now stick them together definitely with long stripes of adhesive tape. Finished!
